

LEGACY® PLATINUM

The Perfect Charge Every Time

The Legacy® Platinum SCR charger uses an intelligent microprocessor to control charge current and voltage during the charge cycle. This precise control allows the Legacy Platinum SCR to charge a range of battery technologies including high gravity and Valve Regulated Lead Acid (VRLA). In addition, they will effectively charge under a wide range of temperature environments and variations in AC line voltage.

LEGACY® PLATINUM

LEGACY® PLATINUM CHARGER

Legacy® Platinum Advantages:

- Three-high stackable cabinets for space savings
- Designed for eight hour or less recharge time. Great for single shift to three shift battery charging operations
- Delayed start or blockout charging options for off-peak charging which may lower electricity bills
- LED charge status indicators are easy to see from a distance
- Charge profiles - Flooded (preset temperature compensation); VRLA for maximum battery charging flexibility or maintenance mode

1-Phase - Advantages:

- Selectable charge profiles - Flooded or VRLA for battery charging flexibility
- Automatic start
- Equalize - By cycle count or day of week
- Cable lengths - Standard 10' (longer lead lengths optional)
- Dimensions: 19"W x 27"H x 17.5"D
- Refresh charge
